As Columbus continues to develop, the construction of new streets requires new street names. The naming of a street may appear minor in the issues of growth in the City; however, it is an important task in maintaining safety, efficiency and simplicity in today's highly mobile society. Over time, certain words have become over used in the naming of our streets and should not be used in the names of new streets.

We are providing this list as a helpful reference for those considering names for new streets. These words should be avoided.
